

It's the first critical minutes after an accident...

Is Your Driver Setting You Up For A Lawsuit?

Right now, at this very moment, if one of your drivers had an accident – would they know what to do?

It doesn't matter who's at fault. Police don't write reports for most "minor" accidents. If your driver is unprepared, disputes and costly lawsuits are almost guaranteed.

Add to that the very real possibilities of fraud and inflated claims, and even a "minor" accident can turn out to be a long, drawn out, expensive nightmare.

Be Prepared With AxiKit!

With AxiKit, your driver will know exactly what to say and do, every step of the way.

AxiKit walks them through the entire process, from their first statements, to gathering witness information, to taking pictures at the scene.

AxiKit is a complete system with everything they'll need... a special single use Accident Camera with flash, fact saver form, step by step guide, witness cards, reminder decal and more in a durable tamper resistant container.

AXiKit
